

At Plant Lipids Private Limited, we are committed to maintain the highest standards in Quality, Food safety and Feed safety by meeting the expectations and requirements of our customers and complying with applicable statutory and regulatory requirements.

Our focus on research and adaptation of state of the art technology ensures the best quality in our products which comply with the latest quality, food safety and feed safety management systems. We establish controls measures to prevent food fraud and threat in our supply chain. We are committed to communicate, implement and maintain quality and food safety at all levels by setting SMART objectives through risk based process approach to identify risks and opportunities in our system and update them as part of continual improvement.

We also strive to create an excellent working environment where employees are trained and motivated to communicate freely to encourage team work leading to desired performance outputs.”

Feed Safety: In addition to the matters specified in quality and food safety policy, we also ensure that the product certified under FAMI-QS meets all legal, regulatory and customer requirement with respect to European code of good practices for specialty feed ingredients and their mixtures.
